

Young Indians Parliament — Organiser Guidebook

For any Yi chapter organising team running a YIP chapter round on the live platform

- **Event · dates · venue:** see your filled-in **cover sheet** (00-Chapter-Cover-Sheet.md)
- **Platform:** <https://yi-connect-app.vercel.app/yip>

Read this once before Day 1. Keep it open on your phone or laptop during the event. Every screen name, tab, and button below is exactly what you will see in the live app.

Before anything else: print the **cover sheet**, fill it in for your chapter, and staple it to the front of this guide. Nothing is pre-done for your event — [section 3](#) walks you through every setup step (participants, allocation, parties, topics, questions, volunteers, jury, chat channels, rehearsal). Wherever this guide needs an event-specific value — dates, party count, jury, contacts, deadlines — it's on your cover sheet.

Table of contents

-

1. What you're running

Young Indians Parliament (YIP) is a 2-day mock parliament for school students (Classes 9–12). Over the two days, your chapter's students (the participant count is on your cover sheet) take on the roles of a real Indian Parliament — Speaker, Prime Minister, Cabinet Ministers, Leader of Opposition, party leaders, and Members of Parliament — and debate real topics. A jury watches and scores each participant on the official Yi 2026 Evaluation Workbook rubric. On Day 2 the scores become a leaderboard and awards.

Your job as an organiser: finish the setup checklist, run the live floor from the **Control** tab, run the elections, moderate the chat, keep the jury scoring, and publish the results.

Who can be on which screen:

Who	Where they go	How they get in
Organisers (you)	https://yi-connect-app.vercel.app/yip/login	Email + password, or Continue with Google
Students	https://yi-connect-app.vercel.app/yip/join	6-character access code printed on their badge
YUVA volunteers	Same join page	Their own 6-character access code
Jury	The join page → “Jury member? Sign in with email”	Email
Projector (big screen)	<a href="https://yi-connect-app.vercel.app/yip/event/<event-id>/display">https://yi-connect-app.vercel.app/yip/event/<event-id>/display	Public — no login. Also reachable via Open Projector View at the top of the Control Panel.

2. Logging in

Your chapter’s organiser account email(s) are on your **cover sheet**. Every organiser account can do everything in this guide, and the organiser accounts are the **chat moderators**.

1. Go to **<https://yi-connect-app.vercel.app/yip/login>**
2. Type your **Email** and **Password** and click **Sign in** (or use **Continue with Google**).
3. You land on the **My Events** dashboard. Click **your event’s card** (the event name and dates on your cover sheet).

If you do NOT see your event card, hard refresh (Cmd+Shift+R / Ctrl+Shift+R) and log in again with the organiser account on your cover sheet. **Do not create a duplicate event** — if the card still doesn’t appear, call the tech-on-call.

The event tabs

Inside the event you’ll see a row of tabs (it scrolls sideways on a phone). Left to right:

Overview · Team · Checklist · Registrations · Participants · Fees · Parties · Allocation · Jury · Volunteers · YUVA Desks · Branding · Topics · Questions · Motions · Bills · Control · Chat · Media · Scoring · Committees · Results · Feedback

(A **Certificates** screen becomes available once results are published — see [section 9](#).)

3. Before the event (setup checklist)

Work through these **in order** — several steps depend on the one before (allocation before parties, parties before channels). Finish A–H before your rehearsal.

A. Participants (your student roster)

1. Open the **Participants** tab.
2. Confirm every registered student is listed and names/schools look right — the total should match the participant count on your cover sheet. Sort out any missing or wrong entries before event week.
3. Each row shows the student's **access code** — this is what goes on their badge.
4. **Sending codes by WhatsApp:** the platform can send access codes to participants over WhatsApp. The bridge needs a **one-time QR scan by the admin** before it can send — do this well before event week, not on the morning of Day 1.
5. Keep a **printed master list of codes** at the registration desk for anyone whose badge is lost.

B. Allocation — run it

1. Open the **Allocation** tab.
2. **Run the allocation.** It splits the house into Government and Opposition, assigns the full leadership (Speaker candidates, PM, Cabinet Ministers, Leader of Opposition), and gives every student a constituency.
3. Verify before moving on: the leadership roles are filled (Speaker candidates, PM, Cabinet Ministers, Leader of Opposition) and both sides of the house have members.
4. **You will see zero constituencies from your own state** — that is **on purpose** (the host state is excluded), not a bug. Don't "fix" it.
5. Re-running reassigns everyone — only re-run if your chapter leadership asks for a full reshuffle.

C. Parties — form them

1. Open the **Parties** tab (allocation must be run first).
2. Press **Form Parties** and choose your **party count** — anything from **2 to 8** works; the platform default is 5; the handbook standard is **7–8**. Record your choice on the cover sheet.
3. The tool splits each side of the house into parties of balanced size — Government parties and Opposition parties.
4. Party leaders are **not** assigned here — they are **elected live on Day 1** from the Control Panel (see [section 6](#)).
5. Do **not** run **Form Parties** again after setup is final unless the membership needs a full redo — re-forming reshuffles everyone's party.

D. Topics

1. Open the **Topics** tab and select the debate topics for your event.
2. Record the final list on your **cover sheet**.

E. Questions (Question Hour prep)

1. Students submit their Question Hour questions from their own phones (max **3 questions** each, minimum 20 characters, addressed to a ministry).

2. There is a **submission deadline** — after it passes, students see “Question submissions have closed.” Confirm the deadline is set the way you want it (the handbook expects questions in at least 4 days before the session) and write it on your cover sheet; ask the tech-on-call if it needs changing.
3. Before Day 2, open the **Questions** tab and **Approve** the questions you want in the live queue (you can also **Reject**). Only approved questions appear in the Question Hour console.

F. Volunteers — load the YUVA list

1. Open the **Volunteers** tab.
2. Add your YUVA volunteers.
3. **Set an access code for each volunteer** — a volunteer without a code cannot log in. (To revoke a volunteer’s access later, **clear** their code field.)
4. On event day each volunteer joins at **/yip/join** with their own code — their phone becomes a roving **Vote Kiosk** (see [section 6D](#)).
5. Hand each volunteer a copy of **03-YUVA-Volunteer-Card.md**.

G. Jury setup

1. Open the **Jury** tab and add each confirmed juror with their **email** — jurors sign in with email via the “**Jury member? Sign in with email**” link on the join page.
2. Write the jury names and emails on your **cover sheet**.
3. Hand each juror a copy of **04-Jury-Card.md** and walk them through one practice score at the rehearsal.

H. Chat — create the channels

1. Open the **Chat** tab and press **Create channels**. This creates **one channel per party + one per committee + the read-only Announcements channel**. (Form parties first — the party channels come from the parties you formed.)
2. Post a welcome / pre-event announcement from the announcement composer (students can read Announcements but cannot post in it).

I. The rehearsal

Run a full dry-run **about a week before Day 1** with at least 2 organisers, 2 volunteers, 1 juror, and a few test students:

- ☐ Log in on every organiser account your chapter uses.
- ☐ Open the **Control** tab, start a timer, fire a sub-phase preset.
- ☐ Run one **practice party-leader election** end-to-end (Hold → Open → vote on a student phone → Close → Reveal).
- ☐ Have a volunteer log in and confirm their **Vote Kiosk** wakes when the vote opens.
- ☐ Have a juror sign in and submit one practice score.
- ☐ Open the **projector view** on the actual hall projector/laptop.
- ☐ Send a chat message, **report** it from a student phone, and handle it from the **Reported** queue.

- Confirm WhatsApp code-sending works (bridge QR scanned).
-

4. Running Day 1

Open the **Control** tab — this is your cockpit for both days. At the top: the event status badge, the **Open Projector View** link, and the day button. The agenda sidebar should show the full 2-day running order — if it's empty when you first open Control, call the tech-on-call well before the event, not on the morning of Day 1.

A. Start the day

1. Click **Start Day 1** (a confirm dialog appears — confirm it). The event goes live; student, jury, and projector screens all start following the Control Panel.
2. After the last item of the day, click **End Day 1**. On the morning of Day 2, click **Start Day 2**.

B. Drive the agenda

The **Current Agenda Item** card shows what the house is on right now, with two buttons:

- **Next** — advance the floor to the next agenda item. Every screen in the building follows.
- **Skip** — jump past an item you're not running.

Each agenda item in the sidebar has a **pencil icon** — tap it to edit that item's planned duration inline (e.g. the Chief Guest is running long).

C. Timers and sub-phase presets

The timer card has a **seconds** box and **Start / Reset** buttons. It **auto-fills from the current item's planned duration**, so usually you just press **Start**.

For the fast-moving sessions, **sub-phase preset buttons** appear under the timer — one tap starts that short timer:

Session	Presets
Question Hour	Question 1:00 · Answer 1:30 · Follow-up 0:30
Zero Hour	Mention 0:30 · Extended 1:00
Debate	Speech 2:00 · Rebuttal 1:00

A **pencil icon** next to the presets lets you edit the labels/durations for the current item.

D. Day 1 running order (what to do at each stage)

Day 1 in brief:

1. **Registration Opens** → **Chief Guest Address** — ceremonial items. Advance with **Next**, run timers as needed.

2. **Speaker Candidates' Speeches** — use the Debate/Speech presets to time each candidate.
 3. **Speaker Election** — when this item is current, an **Open Speaker Election** button appears in the **Digital Voting** card. Run the election (full steps in [section 6A](#)). The winner becomes Speaker and the **next two automatically become Deputy Speakers**.
 4. **Government & Opposition Formation / Cabinet & Party Leader Introductions** — run the **party-leader elections** here, one party at a time ([section 6B](#)).
 5. **Oath Taking Ceremony / Seating of Speaker** — ceremonial; the projector shows the oath.
 6. **Discussion on Matters of Urgent Public Importance (Part 1)** — the first scored session. Confirm jury are scoring ([section 8](#)).
 7. **Short Duration Discussion / Debate** — use the Debate presets.
 8. **Committee Discussions (Bill Drafting)** — students on bill committees draft their bills from their phones (**Bill Drafting** card on their dashboard).
 9. **House Adjourned by Speaker** → click **End Day 1**.
-

5. Running Day 2

1. Click **Start Day 2**.
 2. **Opening Speeches (Part 2)** — same drill as Day 1's MUPI session.
 3. **Question Hour** — when this item is current, the **Question Hour console** replaces the speaker queue:
 - The **Current Question** card shows the question, who submitted it, and which ministry must answer.
 - Use the **Question / Answer / Follow-up** preset timers.
 - When the minister has answered, click **Mark Answered** (you can jot a one-line summary of the response). Use skip for questions you drop.
 - The queue is the list you **approved in the Questions tab** — approve before the session, not during.
 4. **Zero Hour** — students raise urgent matters via **Raise a Motion** on their phones (a motions deadline applies). Review them in the **Motions** tab and call students to speak; time with the Mention/Extended presets.
 5. **Debate on Central Agenda** — Debate presets.
 6. **Bill Presentation & Voting** — each committee presents its bill; the house votes **Aye/No** from the bill session ([section 6C](#)). The reveal shows **BILL PASSED** or **BILL REJECTED**.
 7. **Closing Statements** → **Valedictory** — meanwhile, lock scores and compute results ([section 9](#)).
 8. **Declaration of Awards** — show the published results on the projector.
 9. After the National Anthem, click **Complete Event**.
-

6. Elections & voting (the full playbook)

All voting runs from the **Digital Voting** card on the Control Panel. Students vote on their own phones — the moment you open a vote, an orange **VOTE NOW** card appears on every eligible student's dashboard.

 **Known quirk — read this twice.** After you click **Open**, **Close Voting**, or **Reveal Results**, the panel sometimes doesn't update by itself. **Refresh the page** and the correct state appears. The action DID happen — **do not click the button twice**.

A. Speaker election

1. Advance the agenda to the **Speaker Election** item. An **Open Speaker Election** button appears.
2. Click it (confirm dialog). The house votes on their phones. You see a **live tally (organiser only)** — students can't see it.
3. When voting is done, click **Close Voting**, then **Reveal Results** (this shows the results on the projector and on student phones).
4. The winner is saved as **Speaker**; the **next two finishers automatically become Deputy Speakers**.
5. **Tie?** A banner offers **Open 60-second runoff** — only the tied candidates are on the ballot, and **everyone votes again, including those who voted in round 1**.

B. Party-leader elections (one per party)

The **Party Leader Elections** list shows every party you formed. For each party, one at a time:

1. Click **Hold Election** next to the party.
2. Pick **3–5 nominees** from that party's members.
3. Click **Open Election**. Only **students of that party** get the VOTE NOW card.
4. **Close Voting** → **Reveal Results**. The winner is saved as that party's leader.
5. **Tie?** Same **Open 60-second runoff** banner — tied candidates only, the whole party votes again.

Repeat for every party in the list. After a leader is saved, the button reads **Re-elect** — only use that if you genuinely need to redo it.

C. Bill votes

During **Bill Presentation & Voting**, the bill session offers **Open Bill Vote**. Students vote **AYE** / **NAY** / **ABSTAIN**. Close → Reveal shows **BILL PASSED** or **BILL REJECTED** on the projector.

D. Floor capture & kiosks

While any vote is open, the Control Panel shows the live turnout, e.g. **"2 / <your house size> · Self 2 · Kiosk 0 · Organizer 0"** — Self = students who voted on their own phones, Kiosk = captured by volunteers, Organizer = captured by you.

- **Roll-call list:** open it to see who hasn't voted yet (search by serial or name). Pick a student → record their spoken vote → one-tap **Confirm**.
 - **Vote Kiosks:** YUVA volunteers logged in with their access code sit on a **Vote Kiosk** screen ("Waiting for the organizer to open a vote..."). It **wakes automatically** when you open a vote, and they roam the hall capturing votes from students without phones — pick the student's name, the student confirms their choice, **Confirm**.
 - **Corrections:** every manual/kiosk entry is listed. Use **Correct Vote** if one was recorded wrong — a **reason is required** and it's logged.
-

7. Chat moderation

The **Chat** tab is the moderation console. Every organiser account is a moderator — agree between you who watches it during sessions.

Four sections: **Channels** · **Reported** · **Direct messages** · **Muted students**

- **Channels** — every channel you created (one per party + one per committee + Announcements). Open one to read it and **delete** any message. **Freeze** a channel to stop all posting (e.g. during the Speaker's ruling); **unfreeze** when done.
- **Reported** — every message a student reported lands here. Review, delete the message and/or mute the sender if needed.
- **Direct messages** — oversight of student ↔ YUVA mentor DMs. Students can message a YUVA mentor privately; **student-to-student DMs do not exist**. Volunteers can't reply in-app — if a DM needs an answer, relay it yourself or post an announcement.
- **Muted students** — who's muted and the unmute control.
- **Announcements** — the composer posts to the read-only **Announcements** channel. Use it for schedule changes, lunch calls, "results in 10 minutes" etc.

Ground rules to brief students on Day 1: be respectful, organisers see everything, the report button is there for a reason.

8. Jury & scoring oversight

Jurors score on **their own phones** — they never use your login.

- **Sign-in:** join page → "**Jury member? Sign in with email**".
- **The rubric:** the official **Yi 2026 Evaluation Workbook** — each student is scored out of /100: six juror-scored components (MUPI/Opening Speech 15 · Question Hour 20 · Zero Hour 15 · Political Acumen 10 · Committee 15 · Bill Presentation 15 = 90) plus an automatic **position bonus** (max 10) the system adds for leadership roles. Jurors never add the bonus themselves.
- **Sessions are pre-set:** the juror's screen shows the session being scored and **auto-switches when you advance the house**. Jurors can score the **current session and the**

immediately-previous one only — so they can finish a sheet after you advance, but can't go further back.

- **Offline-safe:** if the hall Wi-Fi drops, jurors keep scoring; scores **sync automatically** when connectivity returns. Don't panic over a "syncing" badge.
 - **Your dashboard:** the **Scoring** tab shows live progress — how many scores are in, per session. Glance at it after each scored session; chase jurors who are behind **before** the next session starts.
 - **Scores locked:** the toggle on the Control Panel **blocks all jury submissions immediately**. Lock only when scoring for the event is finished (just before computing results). You can unlock if a juror needs to finish.
-

9. Results, awards & certificates

Do this late on Day 2, after the last scored session:

1. Confirm the **Scoring** tab shows all expected scores in, then turn **Scores locked** ON in Control.
 2. Open the **Results** tab and click **Compute Results**.
 3. **Review with a human eye before publishing:** the leaderboard (/100) and the **15 handbook awards** (ties are handled by the system — co-winners are shown). Sanity-check the top names against what the jury saw.
 4. Click **Publish**. Students and jury can now see results. (You can unpublish to correct something, then publish again.)
 5. The **Certificates** tab generates **participation and award certificates**.
 6. Put the leaderboard on the big screen via **Open Projector View** for the awards ceremony.
-

10. Troubleshooting

Problem	What to do
I clicked Open/Close/Reveal on an election and nothing changed	This is the known quirk. Refresh the page — the correct state appears. The action went through; do not click again or you may double-act.
A student's app looks stale / shows an old screen	If they installed the app (Install Yi Connect), have them fully close and reopen the app or browser tab — a plain refresh isn't always enough. Same applies after the tech team ships a fix mid-event.
A student/volunteer can't log in with their code	Re-check the 6-character code on the Participants / Volunteers tab — easy to mistype (0 vs O, 1 vs I). Volunteers with an empty code field can't log in at all — set a

Problem	What to do
VOTE NOW didn't appear on a student's phone	code. Make sure the vote is actually open (turnout line visible in Control). Have the student pull-to-refresh or reopen the app. If they still can't vote, capture their vote via the roll-call list or a kiosk.
A volunteer kiosk is stuck on "Waiting for the organizer to open a vote..."	The kiosk wakes within a few seconds of a vote opening. If not, have them refresh; confirm the vote is open in Control.
The timer or agenda isn't updating on a device	Refresh that device. Confirm you actually pressed Next / Start — the projector and phones only follow what Control does.
Jury scores aren't coming in	Check Scores locked isn't ON in Control. Confirm the juror signed in with the email you registered in the Jury tab . If the hall is offline, the scores are likely sitting on their phone and will sync — check the Scoring tab again once connectivity returns.
A vote was captured wrong at a kiosk	Use Correct Vote in floor capture — enter the new value and the required reason.
Inappropriate chat message	Chat tab → open the channel or the Reported queue → delete the message; mute the student if it repeats; freeze the channel if a pile-on starts.
I can't see my event on My Events	Hard refresh, log out and back in at <code>/yip/login</code> with your chapter's organiser account (see cover sheet). Don't create a new event.
I'm locked out / forgot my password	Passwords can't be looked up. Ask the tech-on-call to reset it.
I changed something by mistake	Most actions reverse: unlock scores, unpublish results, unfreeze a channel, correct a vote. Fix it, then tell the tech-on-call so it's tracked.
Golden rule: refresh first, fully-close-and-reopen second, call the tech-on-call if it's blocking the event.	

11. Who to contact

Tech-on-call: see your cover sheet (name + phone) **Event admin (your chapter):** see your cover sheet (name + phone)

Reach the tech-on-call for: password resets, an event you can't see, the questions deadline, anything blocking the live session that a refresh didn't fix.

Guide prepared for Yi chapter organising teams. Screen names, tabs, and buttons match the live platform at <https://yi-connect-app.vercel.app/yip>. Fill in `00-Chapter-Cover-Sheet.md` for your event-specific values. Last updated 12 June 2026.
